MPI

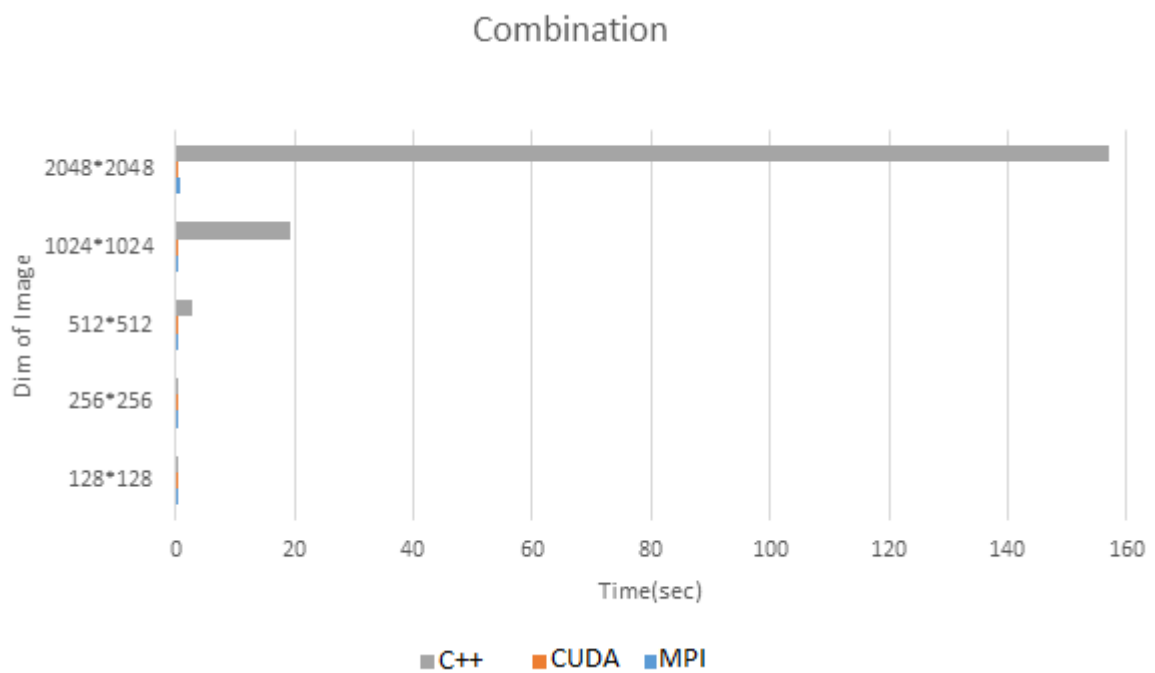

CUDA

C++ Threads

Comparison of MPI,CUDA and C++ Threads

	Mpi (seconds)	Cuda(seconds)	Threads(seonds)
128*128	0.07	0.16	0.132
256*256	0.075	0.161	0.428
512*512	0.11	0.162	2.885
1024*1024	0.249	0.182	19.262
2048*2048	0.938	0.317	156.9

Table of comparison of execution times

We have included one single CMakeLists.txt common for all the 3 files. Prior running the cmake commands, please make sure the following commands are run:

- module load gcc/4.9.0 //(which is the default gcc version for pace)
- module load cuda/9.1 //(which is the default cuda version for pace)
- module load openmpi //(which is the default openmpi version for pace)
- module load cmake/3.9.1 //(which is the default cmake version for pace)
- Create a directory within the p3 folder, we have created a build folder. Go to the build folder and give “ cmake ../ “
- The binaries of all the 3 programs will be found there.exit
-
